this book addresses a new interdisciplinary area emerging on the border between various areas of mathematics physics chemistry nanotechnology and computer science the focus here is on problems and techniques related to graphs quantum graphs and fractals that parallel those from differential equations differential geometry or geometric analysis also included are such diverse topics as number theory geometric group theory waveguide theory quantum chaos quantum wiresystems carbon nano structures metal insulator transition computer vision and communication networks this volume contains a unique collection of expert reviews on the main directions in analysis on graphs e g on discrete geometric analysis zeta functions on graphs recently emerging connections between the geometric group theory and fractals quantum graphs quantum chaos on graphs modeling waveguide systems and modeling quantum graph systems with waveguides control theory on graphs as well as research articles

the importance of accuracy verification methods was understood at the very beginning of the development of numerical analysis recent decades have seen a rapid growth of results related to adaptive numerical methods and a posteriori estimates however in this important area there often exists a noticeable gap between mathematicians creating the theory and researchers developing applied algorithms that could be used in engineering and scientific computations for guaranteed and efficient error control the goals of the book are to 1 give a transparent explanation of the underlying mathematical theory in a style accessible not only to advanced numerical analysts but also to engineers and students 2 present detailed step by step algorithms that follow from a theory 3 discuss their advantages and drawbacks areas of applicability give recommendations and examples

this is the second of three planned volumes in the final report on the cleaning and excavations at the late bronze age site of vronda near kavousi in eastern crete it describes the excavation stratigraphy and architecture of the buildings on the slopes of the vronda ridge building complexes e i o n and l m building f and the pottery kiln as well as areas excavated on the periphery that did not belong to any of these buildings it also presents lists catalogs and images of artifacts and ecofacts that were uncovered at the site
