meteorology of tropical west africa the forecasters handbook presents the science and practice of weather forecasting for an important region of the tropics connecting basic theory with forecasting practice the book provides a unique training volume for operational weather forecasters and is also suitable for students of tropical meteorology the west african region contains a number of archetypal climatic zones meaning that the science of its weather and climate applies to many other tropical regions west africa also exhibits some of the world's most remarkable weather systems making it an inspiring region for students to investigate the weather of west africa affects human livelihoods on a daily basis and can contribute to hardship poverty and mortality therefore the ability to understand and predict the weather has the potential to deliver significant benefits to both society and economies the book includes comprehensive background material alongside documentation of weather forecasting methods many examples taken from observations of west african weather systems are included and online case studies are referenced widely

research on forecasting methods has made important progress over recent years and these developments are brought together in the handbook of economic forecasting the handbook covers developments in how forecasts are constructed based on multivariate time series models dynamic factor models nonlinear models and combination methods the handbook also includes chapters on forecast evaluation including evaluation of point forecasts and probability forecasts and contains chapters on survey forecasts and volatility forecasts areas of applications of forecasts covered in the handbook include economics finance and marketing addresses economic forecasting methodology forecasting models forecasting with different data structures and the applications of forecasting methods insights within this volume can be applied to economics finance and marketing disciplines

presents an overview of the meteorology and climatology of the antarctic aimed at the forecaster who are new to working on the

continent many forecasters who arrive at antarctic research stations have no previous experience of forecasting on the continent and many come from the northern hemisphere so making it even more difficult for them to adjust to the analysis and forecasting tasks that they will have to carry out although the majority of the forecasters will have had some training in antarctic forecasting methods prior to travelling south this section of the handbook should be a useful introduction to the meteorological conditions experienced across the continent in addition in appendix 4 there is a suggested training programme for antarctic weather forecasters that presents a more structured introduction to analysis and prediction techniques for those who are required to prepare training modules

this is the ultimate guidebook for anyone who needs to know the details of operational weather analysis and forecasting not just theoretical aspects and basic concepts it is geared toward meteorology professionals students pilots flight dispatchers amateurs storm chasers and spotters basic physical concepts are reviewed and then the book covers thermodynamics surface analysis and upper analysis there is a thorough overview of weather systems including their thermal structure dynamics and effects special problems such as thunderstorms winter weather and tropical weather are treated in detail the margins are filled with forecasting facts hard hitting quotes educational stories and even a few fun weather jokes with added emphasis on analysis visualization and awareness of model limitations readers learn to use tools properly and are always a step ahead

greater data availability has been coupled with developments in statistical theory and economic theory to allow more elaborate and complicated models to be entertained these include factor models dsge models restricted vector autoregressions and non linear models

a guidebook to operational weather forecasting
